

RHEINZINK – The Company

RHEINZINK GmbH & Co. KG with its headquarters in Dateln, on the edge of the Ruhr region, was founded in 1966. RHEINZINK was the first manufacturer in Europe to replace the traditional pack-rolling process with the completely new innovative technology of the continuous broad-strip casting and rolling line. Today the company has a production capacity of approx. 160,000 tonnes per year and employs a workforce of over 800 people. RHEINZINK is present in 26 countries throughout the world.

The RHEINZINK® Product Range

RHEINZINK® sheets and strips: quality materials for modern constructional drainage

RHEINZINK®-Roof Drainage System:

RHEINZINK® products are available either as "bright-rolled" or as „preweathered“ material. (Preweathered in either blue-grey or graphite-grey*).

RHEINZINK® - Roof Drainage System

The RHEINZINK®-Roof Drainage System is a maintenance-free system which has been developed for the special requirements of the construction industry. The range consists of prefabricated parts, manufactured to a high degree of exactness and includes gutters, angles, downpipes, connections and fittings; guaranteeing an economical roof drainage system.

RHEINZINK® – The Material for Roofs and Facades

The high-quality appearance and the many different processing options ensure that RHEINZINK® is an ideal material for the cladding of roofs and facades. Excellent ductility and a wide range of seam and system techniques mean that the right solution is always available even with complex construction projects. In addition to the technical and economic advantages it is also the aesthetic benefits that make RHEINZINK® a special feature of architectural design.

RHEINZINK® Products – Long-Lasting, Maintenance- Free and Environmentally Friendly

RHEINZINK® is temperature-resistant, non-combustible and does not decay. RHEINZINK® roofing will offer a service life of at least 80 - 100 years. RHEINZINK® does not require maintenance or cleaning and preserves its outstanding properties for many generations.

RHEINZINK® – The Natural Material

RHEINZINK® is a natural material which meets the most stringent ecological requirements. RHEINZINK® does not harm the environment either during manufacture or its lengthy service life. Its recycling rate is over 90 %. Following a comprehensive evaluation of its entire life cycle – winning of raw material, processing, usage and recycling – the material RHEINZINK® has been certified as an environmentally compatible building product by the AUB.

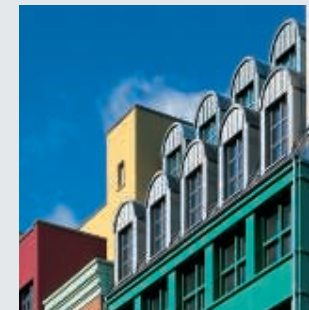

RHEINZINK® – The Material

RHEINZINK® is an alloy of quality zinc with a purity of 99.995 % which also contains copper and titanium. In just one operation the raw material is melted down, cast, rolled and wound up in coils. The patented broad-strip casting and rolling line ensures a uniform-quality material free of all defects.

Quality Standard

Opting for RHEINZINK® always means opting for quality. The high manufacturing stan-

dards are guaranteed by constant checks and extensive laboratory testing. The chemical consistency, the mechanical/technical properties and all material tolerances undergo permanent checks. With the award of the QUALITY ZINC symbol and certification according to DIN EN ISO 9001:2000 all RHEINZINK® products fulfil the highest quality criteria.
